Report of the Board of Directors

Robit is a global growth company that sells and services drilling consumables for customers for applications in the tunnelling, geothermal heating and cooling, construction and mining industries worldwide.

The Company's business is divided into the Top Hammer, Down the Hole and Digital Services business units. The Company has 18 own offices and active sales networks in 115 countries. The Company has production in Finland, South Korea, Australia and the UK.

The company is listed on the Nasdaq Helsinki Ltd First North Finland marketplace with trading code ROBIT. the biggest sales region with 45.4 % of sales. Thanks to the acquisition in Australia, the growth in the Asia and Oceania region was 156.7 %, accounting for 36.2 % of total Group sales. Russia and the CIS countries had a slight increase of 6.5 %, corresponding to 5.2 % of the Group's sales. The Americas region failed to reach its growth targets and sales remained flat.

The EMEA region achieved growth of 16.0 %. The total sales volume was EUR 29.0 million. The recent acquisition of Bulroc (UK) Ltd supplements the offering especially in the Construction market segment. This will open the gate to new, bigger construction projects in Europe. DTARobit's Down the Hole offering gives increasing opportunities in the African mining segment.

(Million euro)	H2/2016	H2/2015	Change %	2016	2015	Change %

Market review and sales by territory

Net sales and profitability

Robit Group net sales increased 40.2 % to EUR 63.9 million (FY 2015: 45.6). Group EBITA for the financial year 2016 was EUR 6.8 million (FY 2015: 3.4) and net income was EUR 4.6 million (FY 2015: 2.2). It should be noted that group consolidation includes H2 income statement figures regarding new group companies.

The general market situation remained stable, but with initial signs of an improvement in the markets at the end of the period. There are positive expectations for a slight increase in the market during 2017. This concerns especially the mining segment as well as construction in certain markets such as the USA. However, these changes in the market are not considered to be significant, especially when taking into account the fact that Robit operates in four market segments: Mining, Construction, Tunnelling, and Geothermal Heating and Cooling.

Robit sales developed positively in three out of the four sales regions. Europe, Africa and Middle-East remained

The Asia and Oceania region continued to grow both organically and especially structurally. Total sales for this region amounted to EUR 23.1 million. The active sales work in the Korean market and in other Asian countries further increased sales in this region. Through the acquisition in Australia, Robit obtained a firm foothold in the Australian market with three local sales offices. This is expected to ensure a positive opportunity for further growth. In January 2016 the Robit Thailand sales office was opened in Bangkok. This sales office will further reinforce the company's presence in Asia.

Russia and the CIS countries grew slightly, reaching a sales volume of EUR 3.3 million. The exceptional trade situation with western economic sanctions complicated business practice in Russia. Robit however succeeded in maintaining key customer relationships, which resulted in slight growth. The sales office in Moscow, Robit OOO continued its activity among Russian customers, showing again the importance of a local presence and the opportunities that this offers. Robit aims to keep its position in the area long term. The Americas sales region achieved a sales volume of EUR 8.5 million. The area had zero growth, but the company's prior investments in sales offices in USA and Peru together form the platform for future operations. This together with the fact that Americas region will be the focus area during 2017, is expected to return the region to a growth curve. The forecast increase in economic activity in the USA will hopefully help in reaching the target. used in industrial heating and cooling applications. The environmental-friendly trend is expected to expand to new countries, which will further increase Robit's sales potential.

To summarize, thanks to the strategic acquisitions in Australia and UK, the DTH business unit was strengthened significantly. Robit now has two strong business units of equal size: Top Hammer EUR 33.5 million and Down the Hole EUR 30.4 million. This is

Net sales by business

(Million euro)	H2/2016	H1/2016	H2/2015	H1/2015	2016	2015	Change %
Top Hammer	19,0	14,5	15,3	14,6	33,5	29,9	12,0 %
Down the Hole	23,9	6,5	8,4	7,3	30,4	15,7	93,6 %
	42,9	21,0	23,7	21,9	63,9	45,6	40,2 %

*Sales split between Top Hammer and Down the Hole business has been reclassified from information shown in offering memorandum.

In conclusion, Robit is investing in its sales and marketing activities as stated in the company's strategy. Coupled with the signals of an improving market situation, this gives a positive outlook for 2017.

During 2016, sales for both the Top Hammer (TH) and the Down the Hole (DTH) business developed positively. The increase in sales in the TH business for FY 2016 was 12.0 %. The full package of bits and drill steel products for our dealer network and end users has been and will form the main tool for market penetration to customers. The Korean drill steel production grew positively during the year.

The Down the Hole business doubled its sales volume with an increase of 93.6 %. The main reasons for the growth were of course the acquisitions in Australia and UK, which both strengthened the DTH product line. The growth includes half-year figures for sales by the acquired companies. The new comprehensive offering including the widest range of DTH hammers in the market combined with DTH bits will give totally new opportunities for the DTH business unit. The DTARobit products were especially dedicated to the Mining segment and BulrocRobit's products to the Construction segment, with a bigger hole size of up to 1.2 metres used in piling applications. The strong market position in Scandinavia for the Geothermal Heating and Cooling segment enabled stable sales in the region. The geothermal drilling is more widely estimated to give stability to Robit's future business, as well as growth potential. The third business unit, Digital Services, did not record any real sales yet in 2016. The technology has reached a point that enables active sales and marketing in 2017. The new technology will also most probably support the sales of the other two business units, TH and DTH, by opening new customer contacts for these.

Research and development - developing the offering

The Digital Services business achieved the genuine status of a strategic business unit (SBU). The offering obtained a new product in the form of the manual hole deviation instrument "M-Sense". The roadmap for digital services, with related concepts and instruments, was defined more specifically and further developed. The durability of the Sense Systems improved and active sales and marketing is starting in 2017.

The Digital Services business includes new technologies such as IoT, modern sensor technology, wireless transmission, cloud computing, Big Data and imaging. These technologies will form an ecosystem with applications for customers operating with the Top Hammer and Down the Hole drilling methods. The first application is the unique drill hole measurement technology branded as Robit Sense Systems. With this system the straightness of a drill hole can be measured utilizing special technology that is integrated into a

standard drill string and rig. The results can be obtained immediately after the hole has been drilled, unlike existing manual systems, where measuring is carried out as a separate operation afterwards. Robit Sense Systems was presented at the international MinExpo 2016 in Las Vegas, where it aroused great interest.

During 2016 Robit launched the Top Hammer drill tube product line for underground and surface drilling. The product technology developed improves hole straightness and drilling efficiency especially in long hole drilling. The drill tubes can be used as a complete drill string or as a single guide tube. The new product The Company's extensive own service centre network, which it has invested in over the past few years, constitutes a better source for different customer needs and end-user feedback from different parts of the world and different ground conditions. This is essential in this business segment if Robit is to develop the best possible products and offering for customers.

The company has capitalized patent, research and development costs during 2016 totalling EUR 0.7 million (FY 2015: 0.7). Total costs relating to research and development were 2.4 % of net sales (FY 2015: 3.0 %).

range supports Robit's full package Top Hammer offering. In the DTH piling application the Company continued to develop the Robit Flow Control system to prevent flushing air to escape to the ground during drilling. This state of art technology was also combined with the Robit Prime series in large sizes (hole diameter +400mm). Flow Control system functionality was optimized with advanced computational fluid dynamics (CFD) simulations. This proved successful in piling projects with a sensitive ground formation.

Robit's business concept and company size enable the company to react to market changes and market signals as well as to the wishes of individual customers. The customer-oriented applications together with product development programs form the basis for improvement in product competitiveness and for optimized solutions and services for each market segment, application and customer. Robit continued its growth trend in flat market conditions. Thanks to the increased purchase volumes especially in raw materials, the gross margin for Robit products has improved. This concerns especially the established products, which were in the offering before the two acquisitions. Another factor was that the acquired Down the Hole products have had slightly better profitability than the established products. These two factors have improved the overall profitability of the Group. Robit has not seen any major change in end-user price levels.

For FY 2016 EBITDA was EUR 10.3 million (FY 2015: 5.1). The EBITDA margin increased from 11.1 % to 16.2 %. The main factor contributing to this increase was the increase in the gross margin. The increase in fixed costs is because the fixed costs of the two

acquired companies increase total costs, e.g. in personnel expenses (increase of 51.3 %) and other operating expenses (increase of 81.2 %). During 2016 the company's personnel increased by a total of 129 employees, and the total number of employees at the end of December 2016 was 263. The company also recruited new personnel mainly for sales and customer service positions, to safeguard future organic and strategic growth. Investments in sales resources were made in offices in Bangkok, Thailand and in Dubai, UAE.

For FY 2016 EBITA was EUR 6.8 million (FY 2015: 3.4). This change was due to the same reason, namely the two acquisitions. The EBITA percentage improved to 10.6 % (FY 2015: 7.6 %).

Depreciation including goodwill amortization (EUR 1.7 million) for FY 2016 was EUR 5.3 million (FY 2015: 1.7). The increase in depreciation was mainly due to normal investments in machinery and equipment, to the two acquisitions and to capitalized expenses in relation to the Robit Sense System.

Total financial income and expenses for FY 2016 were EUR 0.8 million (FY 2015: -0.4). Financial income was EUR 2.9 million (FY 2015: 0.4). Financial expenses increased from EUR 0.9 million to EUR 2.1. Financial expenses included normal loan expenses amounting to EUR 0.6 million. Currencies underwent fairly large changes during the period and some currencies such as the South African rand remained unfavourable against the euro.

For FY 2016 the return on equity was 9.3 % (FY 2015: 7.4 %) and the return on capital employed was 10.0 % (FY 2015: 9.5 %). Both ratios improved since acquired capital has been utilized to improve returns. The company's cash and cash equivalents amounted to EUR 10.5 million (FY 2015: 33.4) and the net interest bearing debt was EUR 36.9 million (FY 2015: -22.1). The equity ratio was 45.3 %. The company used altogether EUR 56.8 million in the two acquisitions and for this purpose took a new bank loan totalling EUR 36.0 million.

Earnings per share were EUR 0.29 (FY 2015: 0.17).

Major events during the financial year 2016

- Company opened a sales office in Bangkok, Thailand in January 2016.
- Three new strategic business units (SBU) were established in January: Top Hammer, Down the Hole (DTH) and Digital Services.
- Robit won the 1st Award in the competition for " Best Investor Websites" of 2016 in the category of companies listed on Nasdaq Helsinki Ltd First North Finland.
- In June, the company acquired Drilling Tools Australia (DTA), a specialist in the Australian drilling consumables market offering Down the Hole and Top Hammer drilling equipment with corresponding engineered solutions to the mining and construction industry.

In July, the company acquired Bulroc (UK) Ltd, a leading supplier in the business of big Down the Hole hammer and related accessories.

Robit received 3rd prize in the European Small and Mid-Cap Award 2016 in the International Star category. Company announced the renewal of its operating model, switching from a structure of eight regions to four regions in sales operations.

Sales company in Dubai, United Arab Emirates was opened in December.

- Robit was selected as one of the "First North 25" companies as a result of Nasdaq's semi-annual review based on the First North 25 Index.
- Company announced that Harri Sjöholm, Chairman of Robit Plc, would take on the duties of Group CEO on 1 January 2017 until the appointment of a new Group CEO. Mikko Mattila will take charge of operations in the North and South America region and will move to the area.
- Company defined the Robit 3.0 Growth Concept and had started the renewal project at the end of the period.

Group structure

The parent company Robit Oyj has the following subsidiaries: Robit Finland Oy, Robit Korea Ltd, Robit Inc, Robit OOO, Robit SA Pty Ltd, Robit S.A.C., Drilling Tools Australia Pty Ltd, Robit Australia Holdings Pty Ltd, Bulroc (UK) Ltd, Robit Rocktools Sweden AB (dormant) and Robit Africa Holding (Pty) Ltd (dormant).

Far East Asia Sales Executive Denny Tsui from BulrocRobit and Chairman Harri Sjöholm visiting in the piling jobsite in Hong Kong.

Risks and uncertainties

The risks and uncertainties to which the company is exposed relate to the company's business environment, to any changes in this, and to global economic developments. Prospects especially in the euro zone, in Russia and in South American countries are uncertain. During H2 there were no significant changes in Robit's risks and uncertainties.

Additional uncertainty factors are developments in currency exchange rates, the introduction of new information systems and their smooth operation, risks relating to delivery reliability and logistics, IPR risks, hacking and uncertainties relating to the company's operations and corporate governance issues. Changes in the tax and customs regulations in export countries may also complicate the company's export activities or affect their profitability.

The risks can mainly have a negative impact on the company's growth, on its financial position and result, and on its corporate image. Company management does not consider these risks and uncertainties to be significant at the end of the period under review.

Net working capital and investments

Net working capital* at the end of review period was EUR 36.6 million (FY 2015: 14.6). The company's cash flow from operations during FY 2016 was EUR 0.6 million (FY 2015: 2.9).

Gross investments totalled EUR 59.6 million (FY 2015: 7.7). The company's main investments for FY 2016 were the two acquisitions totalling EUR 56.8 million. Other investments were mainly in the capitalized costs in

R&D (EUR 0.7 million) and machinery and equipment (EUR 1.3 million).

At year end 2016 EUR 18.2 million was tied up in trade receivables (FY 2015: EUR 9.2). Trade receivables grew at the end of the year due to the two acquisitions and the increased sales volumes. It should be noted that November 2016 had the highest sales for any month in the history of Robit.

Inventories amounted to EUR 29.2 million (FY 2015: 11.7). Inventories increased by EUR 17.5 million from the comparative period due to the fairly high volume of stocks in the acquired companies. The units are monitoring inventory contents continuously and obsolete or slow moving items are expensed.

Interest-bearing debts at the end of review period were EUR 47.5 million (FY 2015: 11.3), an increase of EUR 36.2 million. New loans were utilized for the acquisitions in Australia and the UK. The Company's net debt at the end of the year was 36,9 million (2015: -22,1).

Information presented in the notes to the financial statements

Information regarding company personnel and related parties has been presented in more detail in the notes to the financial statements.

* According to the calculation method company uses, net working capital consists of following items: inventory, accounts receivable, accounts payable, advances received and other debts (net trading capital). By monitoring and controlling these balance sheet items, company is able to optimize capital use.

Shares and shareholders

On 31 December 2016 the company had 15,883,900 shares. On 31 December 2016 the company had 1,069 shareholders. On 31 December 2016 the company held 94,674 own shares (0.6 % of the shares).

The subscription price in the Initial Public Offering (IPO) was EUR 5.70. At the end of December 2016, the closing price was EUR 7.90 per share and Robit had a market capitalization of EUR 124,7 million. The highest closing price during the year was EUR 9.40 and the lowest price EUR 5.20. The number of shares traded between 1 January and 30 December was 1.9 million, which is 12 % of the total number of shares.

Robit has one share series and all shares have equal voting rights. Each share is entitled to one vote at the annual general meeting.

Personnel, management and board of directors

The number of personnel increased in 2016 by 129 from year end 2015, with the total number of personnel being 263 at the end of the period under review. The personnel from the two acquired companies increased the number of personnel by 116. Personnel growth has been as planned, to enable the company to grow further.

In order to facilitate Robit's growth strategy, the company continued to invest in personnel. The focus was further in sales and sales support, so that 55 % of the white collar personnel were employed in these tasks. More emphasis was given to the company's hiring and training practices. Robit also decided to continue the Trainee program and decided to recruit two new Talents, who will start in January 2017. The basic principle in the talent program is to hire highly

educated young people and train them in-house. With this method Robit can ensure the transfer of valuable experience-based know-how within its organization.

Young and talented employees are a great asset for Robit. The company's age demographics are well balanced and the average age was 41 years. A young organization ensures an ambitious company culture, targeting further growth and winnings. Robit also places strong emphasis on work safety, and a special project was started in the areas of HSE (Health, Safety and Environment), which is being steered by the Australian team.

The company continued to monitor employee satisfaction and feedback via the annual personnel survey. This revealed that personnel were satisfied with the market and customer orientation of the company as well with their own task and task management.

The three new strategic business units and their VPs were appointed: Top Hammer Tuomo Niskanen (59), Down the Hole Olli Kuismanen (41) and Digital Services Rowan Melrose (54).

Jussi Rautiainen (51), served as Group CEO until 2 January 2016. Mikko Mattila (38), M.Sc. (Eng.) was appointed as the new Group CEO. Mr. Mattila has been working in the organization and has had a long, 15 year career at Robit. Harri Sjöholm, Chairman of Robit, took over the duties of Group CEO on 1 January 2017 until the appointment of a new Group CEO. The Annual General Meeting was held on the 18 March 2016 and it confirmed the new members of the Board: Tapio Hintikka, Kalle Reponen, Matti Kotola, Anni Ronkainen and Harri Sjöholm.

Mr. Sjöholm was elected Chairman of the Board.

Decisions by the annual general meeting

The Annual General Meeting was held in Tampere on 18 March 2016. The meeting confirmed the 2015 financial statements and discharged the members of the Board and the CEO from liability for the 2015 fiscal year. The meeting decided to pay a total dividend of EUR 631,373.32, or EUR 0.04 per share. The company had a total of 15,883,900 shares, and altogether 10,827,868 of the shares and votes were represented at the AGM.

Those elected to the Board of Directors are listed in the section "Personnel, management and Board of Directors" above. Ernst & Young Oy, Authorised Public Accountants, were re-elected as the company's auditors, with Mikko Järventausta as principle auditor. The General Meeting also authorised the Board of Directors to decide on the acquisition of a maximum of 1,588,390 own shares, provided however that the aggregate number of own shares in the possession of the Company at any one time shall not exceed 10 % of all the shares in the Company.

Product Support Technician Clifford McGowan from DTARobit in UAE jobsite .

The General Meeting also authorised the Board of Directors to decide on the issuance of shares as well as the issuance of options and other special rights entitling to shares referred to in chapter 10, section 1 of the Limited Liability Companies Act. The number of shares to be issued based on this authorization may not exceed 1,588,390 shares, which currently corresponds to approximately 10% of all the shares in the company. The Company's own shares held as treasury shares and rights may be issued and transferred for example as consideration in corporate acquisitions or as part of its incentive system.

Corporate Governance Statement

The Corporate Governance Statement has been included in the Annual Report for 2016 and is also available on the Company's web pages.

Significant events after the end of the review period

The company has made the following decision as part of the Robit 3.0 Growth Concept and the related renewal project. This has taken place on 1 January 2017:

- The new company structure and related matrix organization starting from 1 January 2017.
- The Company has appointed a new Global Management Team with nine members, including region VPs and SBU VPs as well as the CFO and VPs for R&D and HR starting from 1 January 2017.
- The new CFO, Ilkka Miettinen (53), and the new VP for the Russia & CIS sales region, Jorma Juntunen (60), will start on February and March 2017 in the company.
- The company is at the end of finalizing the IFRS project. Robit will switch to the IFRS accounting system in 2017.
- Purcase of assets in USA (Halco INC)
- Purchase of Halco Brighouse Ltd in England

In accordance with its strategy, Robit is continuing its renewal in order to improve its customer orientation and competitiveness. Through this renewal, the four established sales regions will become even more powerful entities with greater independence, aiming especially at further growth and at strengthening the company's market share in their regions. This new market region structure emphasizes Robit's desire to take decision-making closer to the customer and to link it tightly to the customer-interface, aiming to safeguard the company's future growth.

Board proposal for the distribution of profit

The parent company's non-restricted equity on 31 December 2016 is EUR 46 945 258, of which the net profit for the financial year is EUR 3 517 317.

The Board of Directors proposes to the Annual General Meeting that a dividend of EUR 0.10 per share be paid on the outstanding 15,789,226 shares, resulting in a total proposed dividend of EUR 1,578,922.

The Board proposes that the dividend be payable from 6 April 2017. All the shares existing on the dividend record date are entitled to the dividend for 2016 except for the own shares held by the parent company (94,674 shares).

Financial targets and future outlook

Robit as a Growth Company aims to continue to grow in line with the target set in its strategy. Net sales in FY 2016 increased 40.2 % from the comparative period. The company's long-term (10 year) average annual growth has been 23 %. Robit's goal is also to continue the strong growth rate in the future in accordance with the 15 % growth rate specified in the strategy.

Robit's target in 2016 was to further improve profitability in order to achieve the long-term strategic target of EBITA of +13 %. The actual figure for 2016 was 10.6 %. This was because the overall profitability of the acquired businesses was slightly better than Robit's profitability so far. Nevertheless, the company also managed to improve the profitability of its basic business with its global sourcing activity and internal rationalization measures. Company management continues to further optimize variable cost factors with the product and cost optimization project between the four manufacturing companies: Finland, South Korea, Australia and UK. Since the acquired Down the Hole businesses will account for a proportionately higher share in 2017, Robit is convinced that profitability will at least be maintained at the same level.

Robit believes that the weak market environment is starting to pick up after a flat period of several years. The goal is to combine this expected positive market change with the platform of Robit's 18 sales and service points together with the four automated manufacturing plants. This Robit Growth Concept combined with close co-operation with customers will result in an attractive growth outlook in the coming years. Robit's global market share is still modest, so there is plenty of room to grow. The new supplemented offering gives good opportunities to increase the market share in the drilling consumable business segment. According to management, this will mean that the company will further strengthen its market share and market position. The Company's strategic target is to double its global market share. Continuous growth also means positive motivation for Robit's young organization.

The company's understanding is that there is still room for consolidation in this industry segment. Robit wants to play an active role in this and continues to evaluate potential acquisition candidates in a controlled manner.

Notes to the Financial Statements

Scope of the Consolidated Financial Statements

Robit Oyj is a company is listed in Nasdaq OMX Helsinki Ltd First North Finland marketplace with trading code ROBIT.

Robit Oyj is parent company of subsidiaries, which have been combined to the to consolidated financial statement: Robit Rocktools Sweden Ab (ownership 100 %), Robit Korea Ltd (former YP Robit Ltd), South Korea (ownership 100 %), Robit Australia Holdings Pty Ltd, Australia (ownership 100 %), Drilling Tools Australia Pty Ltd, Australia (group ownership 100 %), Bulroc (UK) Ltd, United Kindom (ownership 100 %), Robit OOO, Russia (ownership 100 %), Robit Inc., USA (ownership 100 %), Robit SA (Pty) Ltd, South Africa (ownership 70 %), Robit S.A.C., Peru (parent direct ownership 99 % and group ownership 100 %) and Robit Finland Oy Ltd (ownership 100 %). Robit Africa Holdings (Pty) Ltd, South Africa (ownership 100 %) is dormant and has not been combined to the consolidated financial statement.

Copy of Consolidated financial statement is available at Robit Oyj Vikkiniityntie 9, FI-33880 Lempäälä, Finland.

Elimination of mutual business transactions

The intra-group distribution of profits, transactions, receivables and debts have been eliminated. The consolidation difference resulted from acquiring a subsidiary has been adjusted by the group reserve formed in the acquisition of the minority interest. Conversely, the depreciation of consolidation difference has been adjusted.

The equity received through the share issue directed to the minority shareholders has been entered as capital gain. The minority share has been split into separate items in income statement and in balance sheet.

Translation differences

The income statement of the foreign subsidiary has been converted to average exchange rate of the financial year and the balance sheet has been converted to Finnish currency by using the respective exchange rate at the closing date. Translation differences resulting from changes in exchange rates as a result of applying the acquisition cost method have been entered into the equity of the group. Average rate difference of the results presented in the income statement and balance sheet for the financial year has been entered into the equity.

Accounting Principles for the Group and Parent Company

Valuation Principles of Non-Current Assets

Variable costs resulting from acquisition and manufacture of assets have been included in the acquisition cost of the non-current assets. The noncurrent assets will be depreciated during their useful life according to plan. In the previous financial year, depreciation according to plan were introduced in depreciation of buildings and movable tangible assets. Buildings and movable tangible assets are depreciated during their economic life.

Depreciation periods

Depreciation method is a straight-line depreciation.

Development expenses	5 years
Other long-term expences	5 - 7 years
Capitalized listing expenses	5 years
Goodwill	5 years
Buildings	30 years
Machinery and equipment of buildings	15 years
Structures	10 years
Machinery and equipment	5 - 10 years
Other tangible assets	5 - 10 years

The depreciation time of development expenses and other intangible assets vary between 5 to 7 years and they are are in line with the managements view of the economical lifetime.

The classification of the development expenses has been changed to meet the amended paragraph in the Finnish Accounting standards. Earlier the development expenses were capitalized as long term expenditure and in the current year as development expenses. The prior year balances have been reclassified to correct line in the balance sheet.

Investments

Investments are valued by acquisition price.

Valuation of Inventories

Inventories are presented variable acquisition cost or lower probable sale price. Variable direct costs have been included in the acquisition cost of inventories.

Items in Foreign Currencies

Receivables and payables in foreign currencies have been converted to Finnish currency by using the respective exchange rate at the closing date.

The covenants relating to loans

The Company has financial institution loans of 41.427.039,80 € related with following covenants:

1) Group equity ratio must be over 32,5%

2) The Company has prohibition of the security for business mortgages pledged. (Negative pledge)

- 3) Net debt to adjusted EBITDA ratio is less than four.
 - Adjusted EBITDA is calculated using annualized net sales of acquired subsidiaries during the year.

The covenants are fulfilled. The Company follows fullfilment of covenants on regular basis.

Lease liabilities Items to be pa

ems to be paid pursuant to the lease agreements				
During the following financial period	141 839,59	112 900,46	666 444,77	177 950,50
Subsequently to be paid	112 728,90	153 114,02	3 845 602,80	294 310,18
Total	254 568,49	266 014,48	4 512 047,57	472 260,68

The company lease liabilities related to company cars and computers.

These terms of contract are in line with general practices in this field.

In a subsidiary the leases include also a lease for plant facility, which leaseperiod is 15 years

Other liabilities

Other guarantee liabilities	763 118,46	1 001 339,66	763 118,46	1 001 339,66
Security deposits	0,00	42 500,00	0,00	42 500,00

Derivate liabilities

Interest rate swap agreements have been outlined for 5-10 years. Pursuant to the agreements, the variable rate of the company's loans is changed into fixed rate.

	31.12.2016	31.12.2015	31.12.2016	31.12.2015
Current value	-7 498,00	-48 520,93	-7498	-48 520,93
Value of underlying commodity	367 032,00	1 460 066,16	367032	1 460 066,16

According to the statement of the Finnish Accounting Board the negative value of derivative (EUR -7.498) has been expensed and accounted as liability. In the comparison period it was not reported as liability. Company has terminated the interest swap-agreement after fiscal year 2016.

Investments in real estate

The company is obligated to revise the deductions of value added tax it has made for the real estate investment completed in 2010 in case the taxable use of the real estate diminishes during the revision period. The last revision year will be 2019. The maximum amount of the liability amounts to EUR 196.949,53
