Robit® SR Integrated Ring Bit System

Cost-efficient integrated ring for large sacrificial casing

DTH SR products are economical and cost-effective in homogenous ground conditions where number and size of boulders are limited. One pilot design can be used to install both regular round piles and interlocked Pipe-Pile-Wall piles – just ring bits require different outside diameters. Robit® Solitary Ring Casing Systems are available for all common Down the Hole hammer designs and can be used in all applications where casing is left in the ground.

Features of Robit® SR Integrated ring bit system:

- Cost-efficient integrated ring for large sacrificial casing
- Available for casing sizes: 508-1524 mm / 20"- 60"
- Compatible with Robit SR pilot bit for solitary rings
- Economical solution for high volume piling projects
